

## Winteq Financial Accounting System (FAS)

Winteq Financial Accounting System (FAS) is an application designed for strictly accounting staff/department. Written in C++ programming language, it is an application designed for Windows operating system. FAS integrates with “Enterprise” Warehouse Management (WMS), and Contract Management System (CMS) products, and can see all transactions and orders processed with the WMS, and CMS. FAS utilizes Microsoft SQL Server database management system as the back-end data depository, and Crystal Reports engine for reports viewing and printing.

### Winteq Financial Accounting System (FAS) Component Diagram:

Winteq FAS has 2 components. 1) Enterprise-DB is SQL Server database back-end data depository; 2) FAS which is a user-friendly Financial Accounting System application to manage Accounts Receivables, Accounts Payables, General Ledger, Financial Reports printing, and Fixed Assets management.

### Financial Accounting System (FAS)

The following is a list of Financial Accounting (FAS) features:

### **Core Features**

- Accounts Receivable
- Accounts Payable

- Fixed Assets Management
- Bank Accounts Reconciliation
- Budgets Management

### **Services and Support**

Winteq provides a full suite of services to augment system implementation. These services are:

- Requirements Study
- Hardware Specification
- Project Implementation
- Maintenance and Support
- Technical User Training
- Full System Documentation
- Warranty, Updates, and Upgrades
- Phone and on-site support

### **System Specification**

Winteq's Financial Accounting System (FAS) is built to run on Microsoft Windows Server Operating System and Windows Computers. Proven technologies such as C++ Programming language, ODBC, and Crystal Reports engine has been used to develop FAS. The design criteria used for the development of FAS were a) client/server technology, b) distributed computing, c) object oriented programming, d) high performance transaction processing, and e) user friendliness.

### **About Winteq (The Win-Win Company)**

Winteq was founded in 1997 to design and develop Enterprise business software. Winteq has extensive experience in Product Design, Software Engineering, Project Management and Implementation, C++ and SQL Server Development. Our experiences have provided us with the knowledge of what really works. Our software was designed/developed based on this experience and technical knowledge. The simplicity, power, and user friendliness of Winteq software is un-matched in the industry. Winteq believes in a Win-Win philosophy of partnering with the customer and will not perform work if it does not result in a Win-Win for both customer and Winteq. Winteq's commitment to customer is un-matched. For more information visit us at [www.winteq.com](http://www.winteq.com) or send email to [sales@winteq.com](mailto:sales@winteq.com) .
